Question 3: Trying Out Some Basic Commands
In this question, we will learn how to read the manual (man) page of a command and how to work with two terminals at the same time. The command we will focus on is echo.
Step 1: Split the terminal
1 Open Tilix.
2 Split it vertically so you have two terminal panes.
Step 2: Open the manual page
1 In the right terminal, open the manual page for echo using the command: man echo
2 Navigate the manual page using:
a Arrow keys to scroll line by line
b Spacebar to scroll one page at a time
3 To open the help page inside the manual reader (for additional commands and navigation tips), press h.
4 To exit the manual page,
two from here. And I'm going to keep these two open.
